

Here is a product that you might want to consider if you in need of an anti-skid surface. Please look over the following information and if we can be of service please give us a call,

PRODUCT DESCRIPTION

Diamond-Grip® is a one-piece metal plank grating manufactured by a cold forming process in the shape of a channel. The web of the channel is the walking surface and has rough serrated edges around diamond shaped openings. Diamond openings are complete with radiused corners at the saddle and side channel locations.

FEATURES & BENEFITS

- Serrated edges around diamond shaped openings provide slip resistance under slippery conditions such as snow, ice, grease, oil, etc.
- Radiused corners reduce the possibility of stress cracks across saddles or at the side channels under various loading conditions.
- Self-cleaning due to resilience of walking surface.
- One-piece metal construction.
- Lightweight design provides high strength to weight ratio.
- Long life span requiring little maintenance.
- Simple and economical installation as planks are self-framing.
- Adaptable to cost effective custom fabrication.
- Can be easily formed in standard channel or custom shapes.

MATERIAL SPECIFICATIONS

- ASTM-A-653, G-90 (Z-275) Pre-galvanized 14 and 12 gauge steel.
- ASTM-A-1011, HRP&O 14 and 12 gauge steel.
- 5052-H32 Aluminum, .080" and .100" thick.
- Type 316L 2B Stainless Steel 14 gauge (up to 11-3/4" width).
- Type 304L 2B Stainless Steel 16 gauge (up to 11-3/4" width).
